

Hello! My Name is myty
and I am an internet
bot

Welcome! Myty. What
are you going to
teach us today!

What is internet safety?

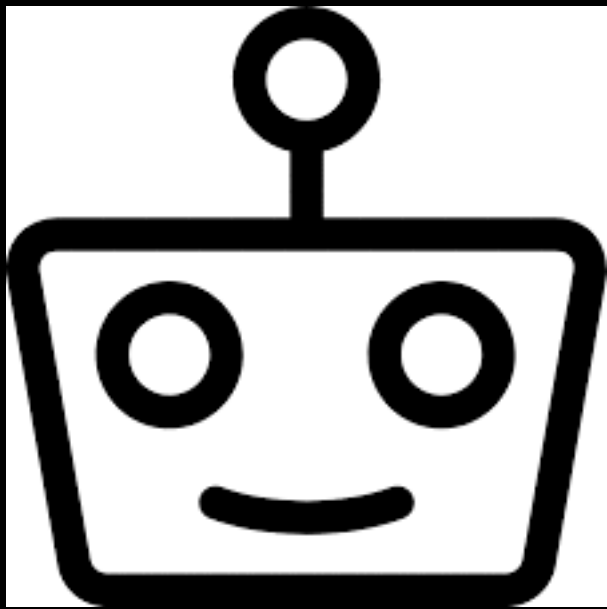

Lets Learn about it today!

Huh! Internet
safety??

Internet is
going to be
here!

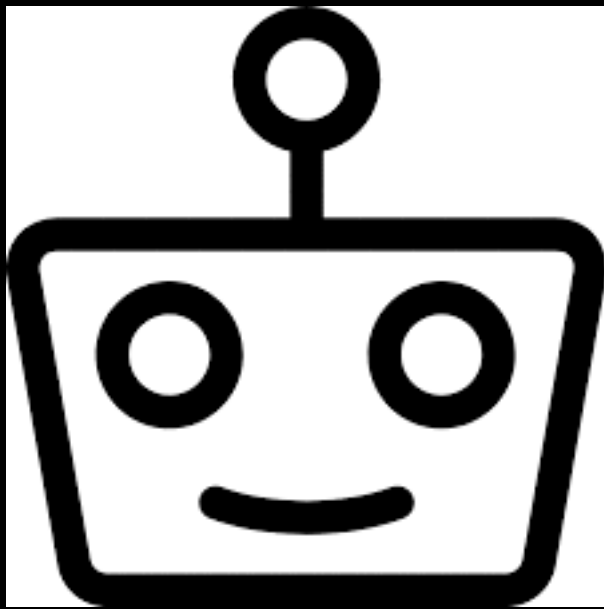

-Unknown

Yes its true! Each one
of us are going to be
a **netizens** and we
must know how to be
safe in this new world

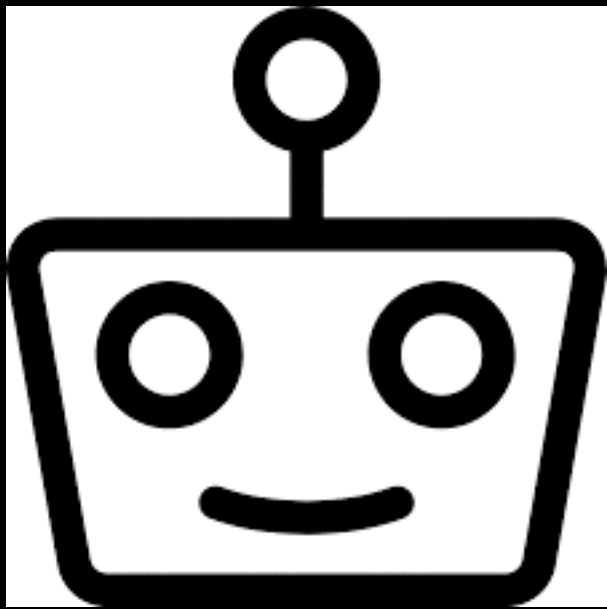

Hey! But whats
netizens???

Netizens are the
citizens of the
internet world

OK! But why do we
care so much about
internet?

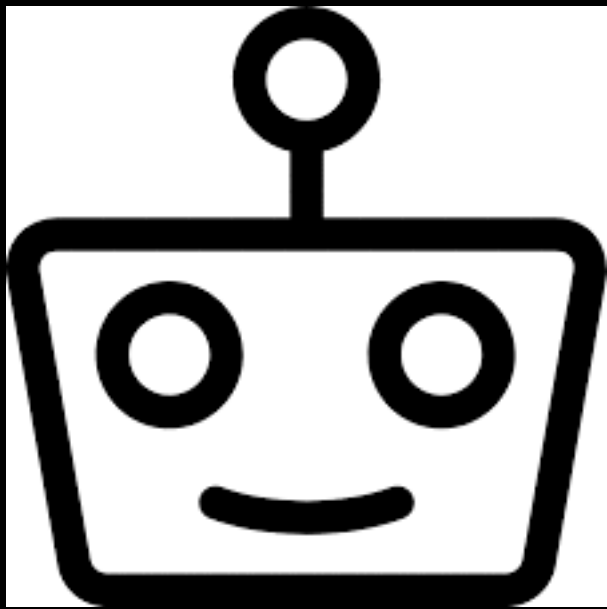

Because internet is
everywhere.

It is touching almost every
aspect of our life today.
We are all heading towards
a digital age.

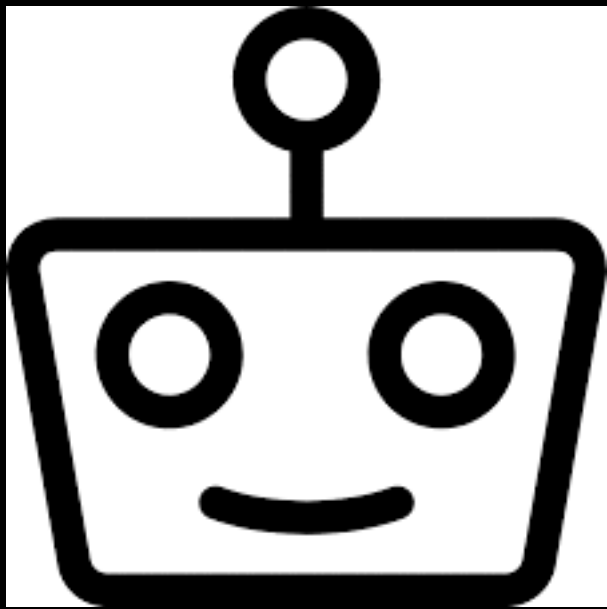

A digital Age!!!
Sounds
interesting.
Tell us more
about it.
We only heard
about stone
age, bronze age.

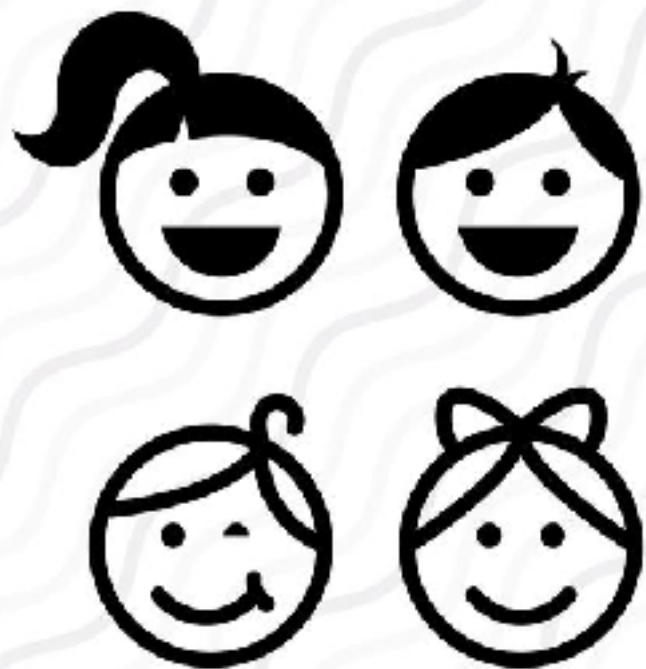

Yes, a world where humans are connected via a technology called internet using a device mainly computer or a smartphone.

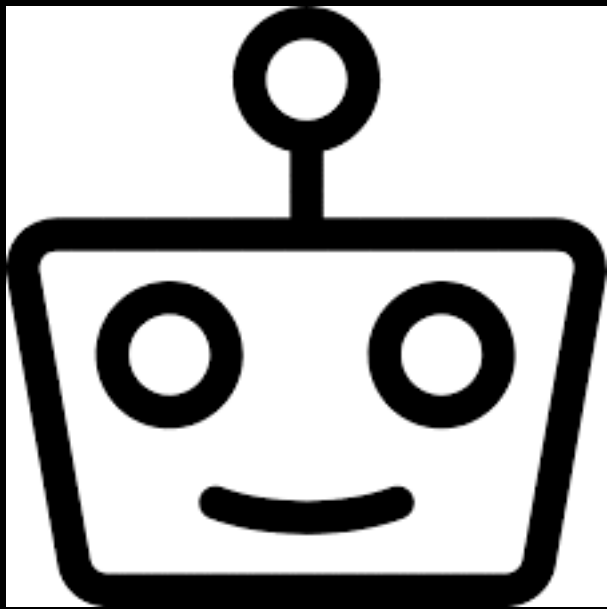

Hmm...

So we need to
know how to use
internet safely.

Agreed...)

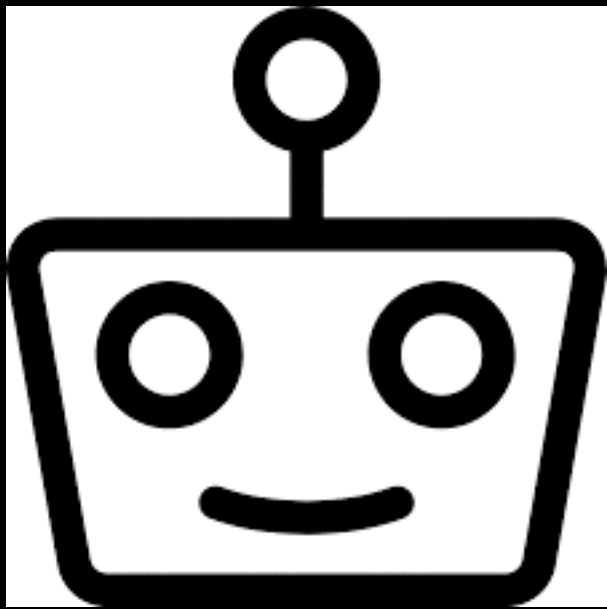

#1

"Password"

Passwords are like
toothbrush, Never share it
with anyone and change
it every 3 months.

Passwords!!
Toothbrush!
Wait, I
think, i am
missing
something.

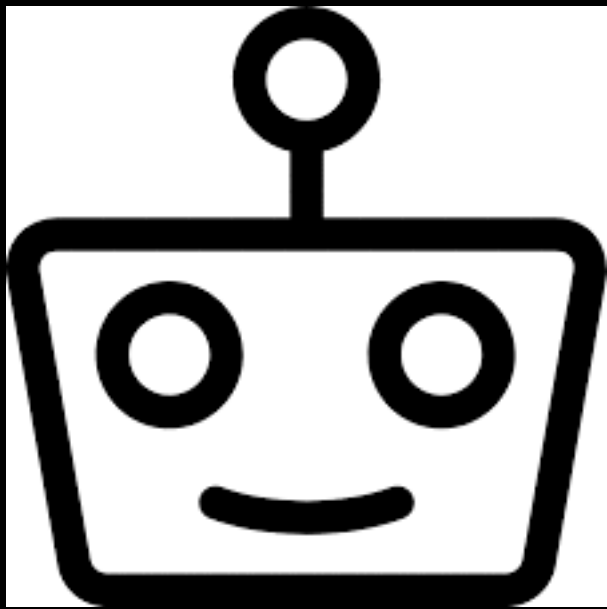

Yes, Just Like you don't share
your toothbrush with anyone,
don't share your password with
anyone.

And just Like you change your
toothbrush everyone once in a
while, change your password
too.

Oh Wow! got it.
My password is
Like my key. I
need to keep it
safe. never
share it with
anyone other
than my parents.

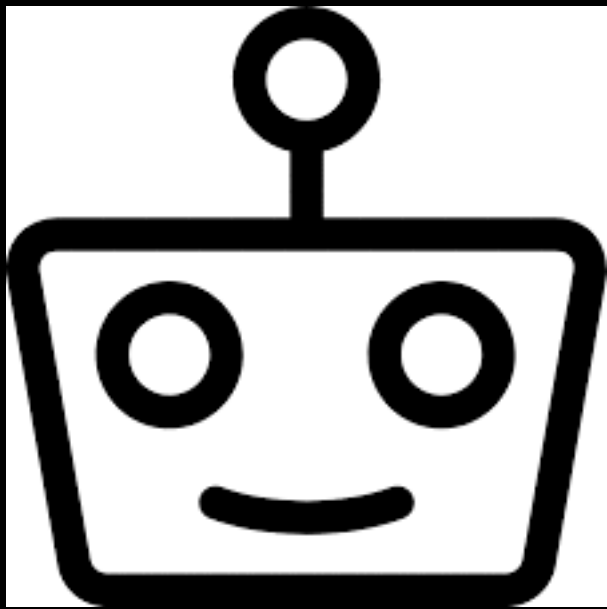

#2

"Password Hack Proof"

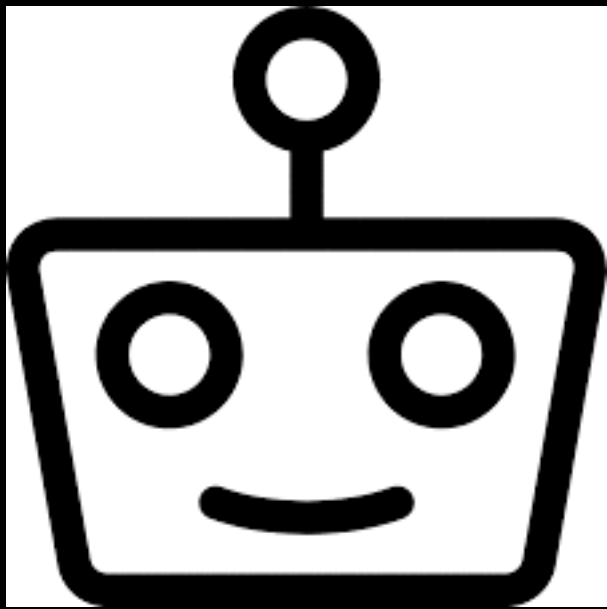

Keep your password
difficult to guess, so
that hackers can't hack
your online account.

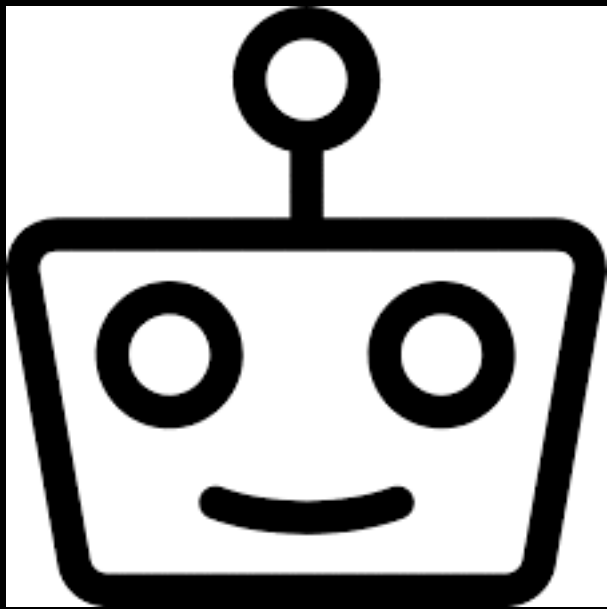

What's
Hacker?

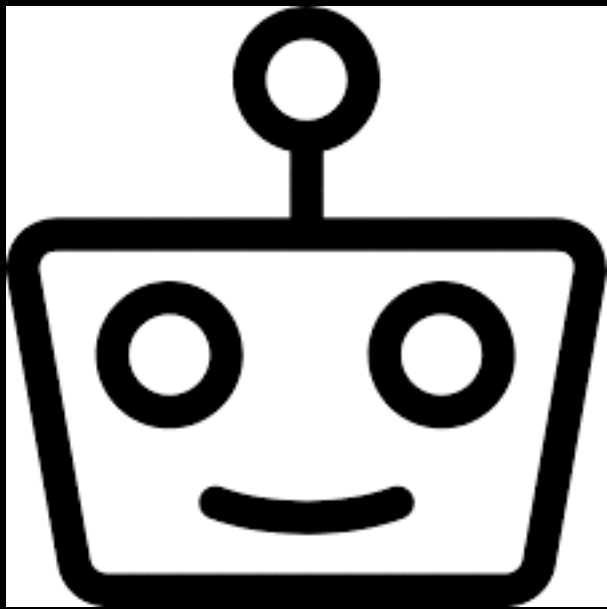

Hackers are online
thieves, they steal
your information to
gain access to your
digital assets.

According to a survey,
"Password" is the most
commonly used password
followed by "123456". Don't
use passwords which are
easy to guess and hack.

Don't use your name,
date-of-birth, Place
of birth, parents
name, celebrity name
in the password.

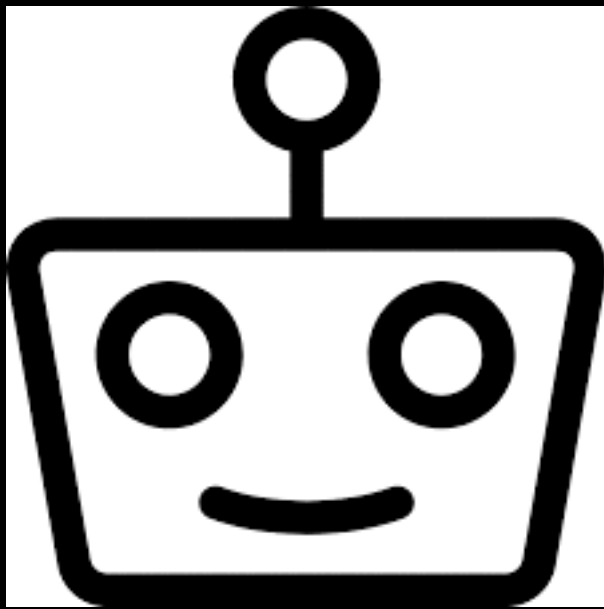

In short,

Make is

unpredictable.

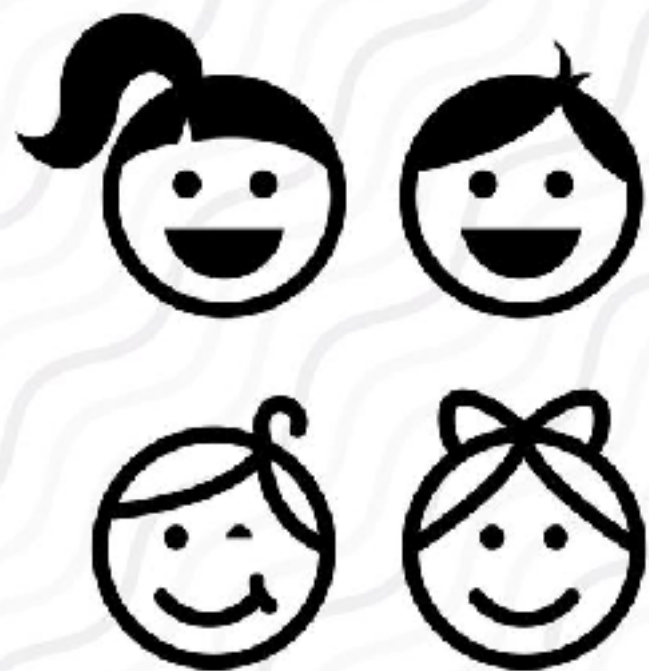

But you must remember it!

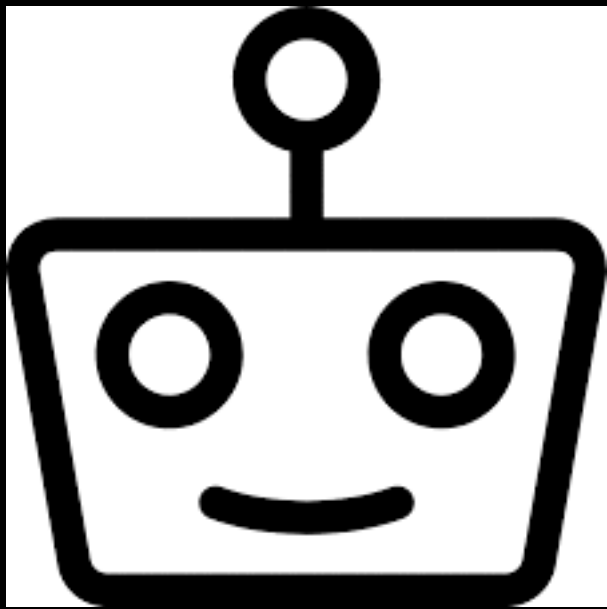

#3

"Personal Information"

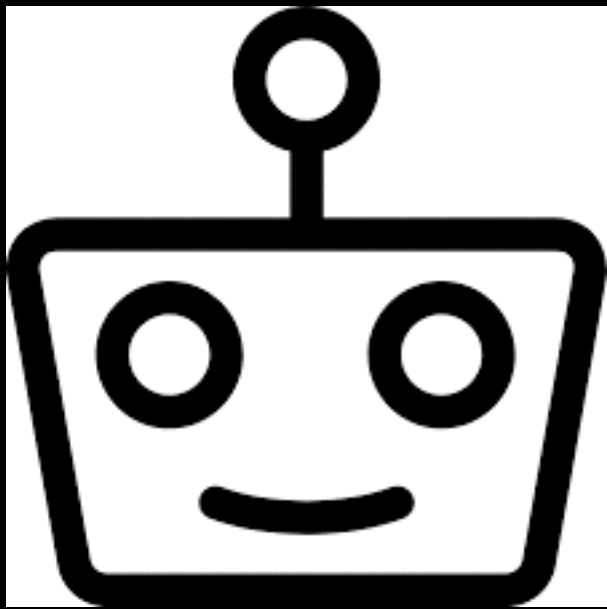

Never share your
personal information to
public platforms online
like social media.

What's
personal
Information?

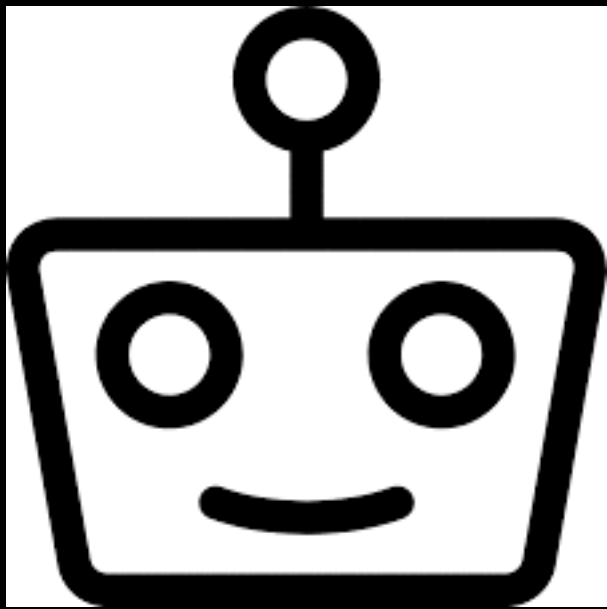

Information that a **stranger**
can take advantage of, Like
your phone number, email,
address, private pictures,
current location,
whereabouts of your parents
and a lot more....

Some weird people can make use of this information to cyberbully you! Steal your digital assets or do harm to your digital identity by being an imposter.

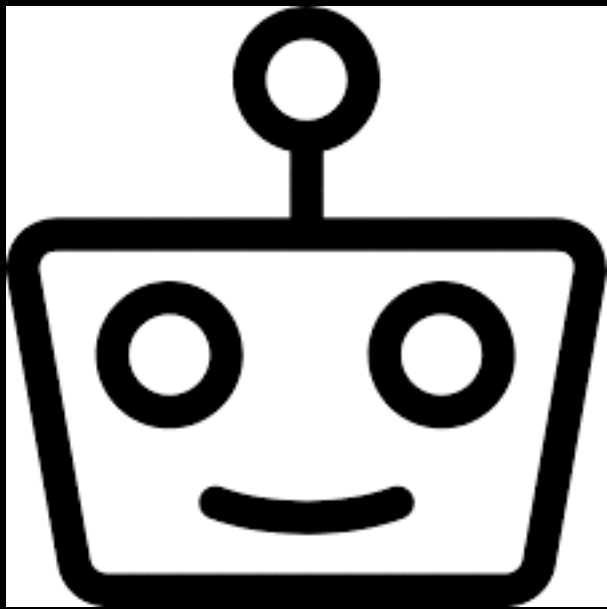

Ohhhh! thats
scary.

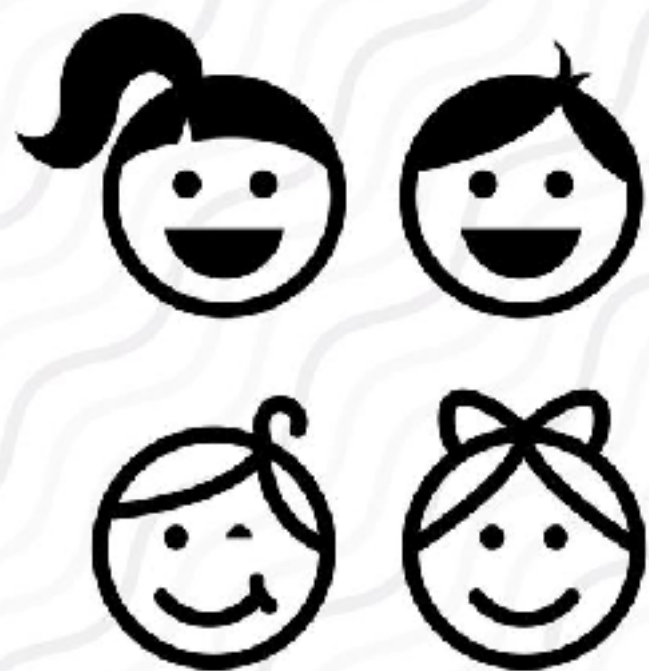

Yes, only when you don't
pay attention to few basic
internet discipline. Its
Like your parents saying
"Never accept free
candies from a stranger"!

Got it, We must
make sure what
information we
put online for
the public to
know about me
and my family.

So here we have come to
an end of today's lesson.
In short, Make sure your
passwords are safe. Don't
talk to strangers, Keep
your information private.

Thank you,
myty!
